CONTENTS OF THIS VOLUME

VOLUME 20

Number 6

Soluble Polymers in Water Purification
B. A. Bolto 987

Blood Compatibility of Polyethylene Oxide Surfaces
J. H. Lee, H. B. Lee and J. D. Andrade 1043

Assembling Nano and Macrostructures and the Supramolecular Liquid Crystal
A. Ciferri 1081

High and Low Density Water in Gels
P. M. Wiggins 1121

Properties of Crosslinked Polyolefin-Based Materials
I. Chodák 1165

Number 5

Coupling Between Electron and Mass Transfer Kinetics in Electroactive Polymer Films—An Application of the *In Situ* Quartz Crystal Electrode
N. Oyama and T. Ohsaka 761

Amphiphilic Polymers from Macromonomers and Telechelics
R. S. Velichkova and D. C. Christova 819

Interactions in Cellulose Derivative Films for Oral Drug Delivery
P. Sakellariou and R. C. Crowe 889

Diacetylenes in Polymeric Systems
T. Ogawa 943

Number 4

Cryogenic Properties of Polymers
O. Yano and H. Yamaoka 585

Determination of MWD and Chemical Composition of Polymers by Chromatographic Techniques
B. Trathnigg 615

Kinetics of Polymer Crystallisation
Y. Long, R. A. Shanks and Z. H. Stachurski 651

Physical Aging of Polymers
J. M. Hutchinson 703

Number 3

The Assessment of Orientation, Stress and Density Distributions in Injection-Molded Amorphous Polymers by Optical Techniques
R. Wimberger-Friedl 369
The Computation of Properties of Injection-Moulded Products
L. F. A. Douven, F. P. T. Baaijens and H. E. H. Meijer 403
Ziegler–Natta Catalysts for Olefin Polymerization: Mechanistic Insights from Metallocene Systems
J. Huang and G. L. Rempel 459
Biomembrane Mimetic Systems
T. Kinoshita 527

Number 2

Synthetic Fibre-Reinforced Concrete
Z. Zheng and D. Feldman 185
Macromolecular Prodrugs
T. Ouchi and Y. Ohya 211
Structural Studies on Crystalline Polymer Solids by High-Resolution Electron Microscopy
M. Tsuji and S. Kohjiya 259
Homogeneous Metallocene–Methylaluminoxane Catalyst Systems for Ethylene Polymerization
S. S. Reddy and S. Sivaram 309

Number 1

Editorial v
Hydrogen Bonded Polymer Blends
M. M. Coleman and P. C. Painter 1
Polycyanate Esters: Science and Applications
T. Fang and D. A. Shimp 61
Reaction-Induced Phase Decomposition in Polymer Blends
T. Inoue 119
Direct Synthesis of Conducting Polymers from Simple Monomers
N. Toshima and S. Hara 155
